◆ Cautions on Use

The product must be handled with care, it is strictly forbidden to fall, and it is strictly forbidden to touch the product, especially the light-emitting surface of the lamp.

Do not use a power supply that does not meet the requirements for driving.

The product should not be lit for a long time in a high temperature and closed environment in an environment within the rated temperature range.

Do not expose the LED directly to high humidity. It should be waterproof and moisture-proof.

The light-transmissive window on the light-emitting side of the product should be made of high-purity quartz glass plate, which can effectively pass 270~285 nm ultraviolet light.

Reflow soldering should not be done more than two times. Please refer to the instruction manual for reflow temperature

This product produces deep ultraviolet rays when energized. This kind of ultraviolet light can cause damage to human skin and eyes, and should be avoided without direct protection. The human body is directly exposed to deep ultraviolet rays.

It is strictly forbidden to look directly at the deep ultraviolet light emitted by this product.

The machine operator must bring an electrostatic ring.

The machine must be grounded.
